*Very satisfied. This is just what I needed for a baby who goes to bed by 6:00pm in a household that stays up until 9:00pm. I don't know how I've survived her first 9 months without it.*

Amy Amazon review

*I have a seven month old at home and we turn the lullabies on anytime we want music in the background. The tunes are easily recognizable and allow grandma and the caretakers to hum along with the music.*
