

‘LectroFanKinder

Your LectroFan Kinder comes with eight preset light and sound combinations. Don't be afraid to make your own combinations and save them as new presets. With millions of colors and more than 75 sounds and lullabies available, it's easy to find one that your child will love.

Your phone communicates with your Kinder using Bluetooth low energy (BLE). You don't need to be in the same room as the Kinder to use the app. If you add more Kinder products, you can control them individually with the same app.

We'd love to hear from you.

Contact us at support@lectrofankinder.com if you have any questions, if you need help, or you'd just like to let us know what you think.

Step One: Download the App

Go to: lectrofankinder.com/app

or search for “LectroFan Kinder”
on the iTunes App Store or Google Play.

The Kinder app works with Apple iOS 9.3
and above, and Android 5.0 and above.

Step Two:

Plug in the LectroFan Kinder and Launch the App

Plug the Kinder into any standard two-prong or three-prong (grounded) wall outlet. It can be inserted so that the light illuminates the wall, or “upside down” to illuminate the floor.

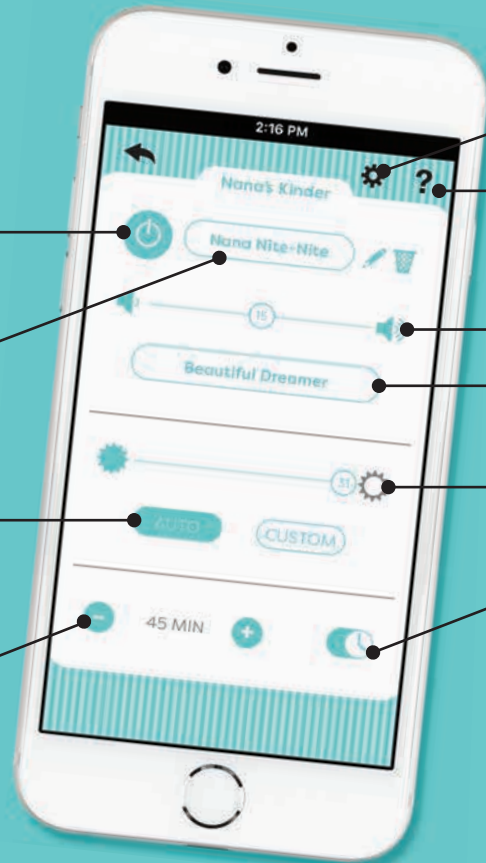

Press the power button once to turn on the Kinder, and then hold it for three seconds until the light flashes blue. This means that it’s ready to pair with your phone.

Be sure that your phone’s Bluetooth is turned on, then launch the app and follow the setup instructions.

Using Your Kinder

This is the screen you'll see once you've successfully paired your Kinder.

Turn your Kinder on or off

Sound and light presets

Choose automatic colors, or select a custom color

Set the timer in 15-minute increments

Configure your Kinder

Turn timer on/off

General Sleep Tips:

- Establish a routine: for example, bath-time before bedtime to help your child relax
- Create a peaceful, relaxing environment with soothing nightlight, calming sounds
- Remove digital screens from inside the room
- Keep the room at a balanced temperature
